

Take control of your waste!

Agritel supplies crushing and compacting machines for a wide variety of waste material, including plastic, cardboard, glass, cans, drums and oil filters. Compacted waste is easier to handle, cheaper to store and transport, and readily accepted by recyclers.

Used as part of a simple waste management regime, Agri-mac machines offer the potential for increased efficiency and cost-effective, environmentally-responsible waste disposal.

Contact our friendly and knowledgeable staff to find out how an Agri-mac machine can benefit your business.

Agri-mac GJK221 Bar/Restaurant Glass Bottle Crusher

The Agri-mac GJK221 Bottle Crusher quickly and safely reduces glass bottles to less than one fifth of their original volume. With a smart stainless steel finish, compact dimensions and easy operation, it's ideal for bars, restaurants and hotels.

The smashed glass – cullet – is accepted by recyclers and the reduced volume makes handling, storage and disposal far cheaper. Cullet is collected in a plastic bin with a capacity of 20kg (about 80 crushed bottles) for safe manual handling.

A compact footprint and standard single-phase electrics make it easy to locate the machine wherever it's needed, minimising handling of bulky waste glass.

The Agri-mac GJK221 is CE certified and safety features include anti-kickback flaps and a fully-enclosed collection bin.

- Safe and easy to use
- Improves efficiency
- Promotes recycling
- Helps achieve green business awards
- 5:1 volume reduction
- Fewer uplifts
- Reduces storage, handling and disposal costs
- **Saves space, time and money!**
