

Crush the cost of waste disposal

Agritel supplies crushing and compacting machines for a wide variety of waste material, including plastic, cardboard, glass bottles, cans, drums and oil filters. Compacted waste is easier to handle, cheaper to store and transport, and readily accepted by recyclers.

Used as part of a simple waste management regime, Agri-mac machines help increase efficiency, improve recycling rates and dramatically reduce the cost of waste disposal.

Agri-mac MG15 TFL Oil Filter & Can Crusher

The Agri-mac MG15 TFL crushes oil filters and cans to a fraction of their original size, minimising storage and disposal costs.

It features a 15 tonne press force and generously-sized compaction chamber, and will crush cans of up to 30 litres' capacity as well as used oil filters.

Waste oil can be collected for recycling or disposal via a drain point.

The machine's compact design and clean operation mean that it can be conveniently sited wherever the waste material is produced. As well as reducing disposal costs, it can improve the tidiness of the workshop area!

- 15 tonne press force
- Large crush chamber
- Sliding door with magnetic closure
- Clear controls for ease of use
- Oil drainage system
- Base suitable for fixing to the floor

TECHNICAL DETAILS

Agri-mac MG15 TFL Oil Filter & Can Crusher

Crush force	15 tonnes
Crush chamber (WxDxH)	400 x 400 x 500 mm
Cycle time	25 seconds
Driving power	4 kW 5.5 Hp
Power supply	220 V 50 Hz
Overall dimensions (WxDxH)	700 x 600 x 2035 mm
