

# Wrap pallets professionally at the lowest possible cost!

Switching from hand to machine wrapping brings many benefits, for large- and small-volume shippers alike.

Firstly, an automated pallet wrapper makes light work of a back-breaking task! Health and safety risks are minimised, and packing-room staff are released for more productive work.

Presentation is improved: pallets are wrapped to a consistently high standard and show improved stability during transit.

What's more, by selecting the right combination of machine and stretchwrap, film usage can be optimised and significant savings made in terms of cost per pallet wrapped and quantity of plastic used: both a cost and an environmental benefit.

*Siat Palletwrapper  
F1-16M*

## General Specification - Siat F1-16M

- Overall dimensions (LxWxH): 2750mm x 1650mm x 2400mm
- Turntable dimensions: 1650mm diameter x 75mm high
- Maximum pallet size (LxWxH): 1200mm x 1000mm x 2100mm
- Maximum pallet weight: 2000kg
- Film reel: 500mm wide x 300mm diameter x 75mm core
- Film carriage lifted by belt with anti-drop device
- Mechanical core brake for percentage stretch and tension
- Simple lever system to engage film tension, with a hand-wheel to adjust tension
- Forklift entry points and hinged column for ease of movement
- CE marked

*Film carriage*

## Options

- 2400mm column
- 1800mm turntable
- Antistatic brush
- Electromagnetic core brake film carriage (Type FM)
- Loading ramp
- Pit frame
- Photocell for dark pallets

## Controls

- Manual or auto mode
- Variable turntable speed with soft start and fixed stop
- Photocell for pallet height detection
- Choice of two auto-wrap patterns
- Timers for top and bottom wraps
- Emergency stop switch
- 240V single phase – 13A – 0.73kW
- IP54 panel rating
