

Wrap pallets professionally at the lowest possible cost!

Switching from hand to machine wrapping brings many benefits, for large- and small-volume shippers alike.

Firstly, an automated pallet wrapper makes light work of a back-breaking task! Health and safety risks are minimised, and packing-room staff are released for more productive work.

Presentation is improved: pallets are wrapped to a consistently high standard and show improved stability during transit.

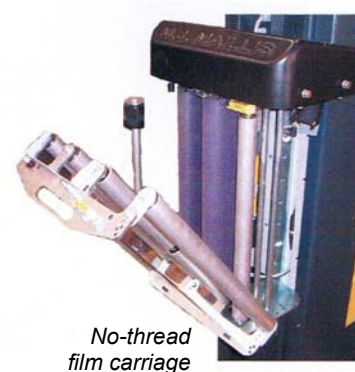

What's more, by selecting the right combination of machine and stretchwrap, film usage can be optimised and significant savings made in terms of cost per pallet wrapped and quantity of plastic used: both a cost and an environmental benefit.

We can supply pallet wrappers from various manufacturers, but our best-selling line continues to be the Siat range of semi-automatic machines: simple to use, robustly built and excellent value for money.

General Specification - Siat PK3

- Power pre-stretch film carriage with no-thread loading system: 200% factory fitted, other gears supplied for 250% or 150%
- Overall dimensions (LxWxH): 2750mm x 1650mm x 2660mm
- Turntable dimensions: 1650mm diameter x 75mm high
- Maximum pallet size (LxWxH): 1200mm x 1000mm x 2100mm
- Maximum pallet weight: 2000kg
- Film reel: 500mm wide x 300mm diameter x 75mm core
- Simple lever system to engage film tension, with a hand-wheel to adjust tension

Controls

- Variable turntable speed with soft start and fixed stop
- Variable carriage raise/lower speed
- Photocell for pallet height detection
- Four wrap cycles
- Programmable number of bottom, top and mid wraps
- Emergency stop switch
- 240V single phase – 13A – 0.73kW

Options

- 2600mm or 3000mm column
- 1800mm diameter turntable
- Antistatic brush
- Loading ramp
- Pit frame
- Platen unit for unstable loads
- Photocell for dark pallets
- Automatic film cut-off
- 10-programme memory with keylock
