

Crush the cost of waste disposal

Agritel supplies crushing and compacting machines for a wide variety of waste material, including plastic, cardboard, bottles, cans, drums and oil filters. Compacted waste is easier to handle, cheaper to store and transport, and readily accepted by recyclers.

Used as part of a simple waste management regime, Agri-mac machines increase efficiency, improve recycling rates and dramatically reduce the cost of waste disposal.

Agri-mac BP40 Plastic Bottle Baler

The Agri-mac BP40 reduces space-hungry waste plastic bottles to neat, compact bales.

Baling bottles couldn't be easier: a unique piercing mechanism eliminates the need to remove bottle caps and the twin-chamber design optimises loading and crushing efficiency.

A trolley is supplied for moving the finished bales.

- No need to remove bottle caps before baling
- Load one chamber while the other is compacting
- Top-loading baler, perfect for locations with height restrictions
- Roller-guided head for easy movement between chambers
- 30-litre waste liquid collection tank with tap connection
- Bale trolley included

TECHNICAL SPECIFICATION

	Agri-mac BP40 Plastic Bottle Baler
Loading aperture (WxD)	700 x 500 mm
Bale dimensions (HxWxD)	1000 x 700 x 500 mm
Bale weight	Up to 40kg depending on material
Press force	Up to 8 tonnes
Cycle time	35 seconds
Noise level	72 decibels
Power supply	220 - 240 V Single phase
Motor	2.2 kW 16 Amp
Overall dimensions (HxWxD)	2326 x 2050 x 820 mm
Transportation height	1978 mm
Machine weight	562 kg
