

Crush the cost of waste disposal

Agritel supplies crushing and compacting machines for a wide variety of waste material, including plastic, cardboard, glass bottles, cans, drums and oil filters. Compacted waste is easier to handle, cheaper to store and transport, and readily accepted by recyclers.

Used as part of a simple waste management regime, Agri-mac machines help increase efficiency, improve recycling rates and dramatically reduce the cost of waste disposal.

Agri-mac V550 Heavy-duty Baler

Ideal for baling tyres

The Agri-mac V550 Heavy-duty Baler handles a wide variety of materials including car and van tyres and bumpers.

It has extended rams and a hefty 50 tonne press force to produce a neat, compact bale weighing up to 610kg.

- Up to 100 tyres per bale
- Generous loading aperture
- Clear controls for ease of use
- Perfect for payload optimisation

Optimise payload - minimise transport costs!

The V550 produces bales which are sized to optimise payload: 48 bales (760 x 1200 x 1500mm) stack in 3 layers of 16 to fill a 40' container or trailer.

Between 60 and 100 tyres can be compressed into a single bale, depending on the type of tyre. The target bale weight for payload optimisation is just over 500kg to make a full load of 25 tonnes. If you're disposing of used tyres, the Agri-mac V550 will help you crush transport costs!

TECHNICAL SPECIFICATION

	Agri-mac V550 Heavy-duty Baler
Loading aperture (HxWxD)	880 x 1500 x 769 mm
Bale dimensions (HxWxD)	1200 x 1500 x 769 mm
Bale weight	Up to 610kg depending on material
Press force	Up to 50 tonnes
Cycle time	40 seconds
Noise level	75 decibels
Power supply	380 – 400 V 3 phase
Motor	11 kW 32 Amp
Overall dimensions (HxWxD)	3500 x 2115 x 1200 mm
Height for transport	2500 mm
Machine weight	1935 kg
