

Take control of your waste!

Agritel supplies crushing and baling machines for a wide variety of waste material. Compacted waste is easier to handle, cheaper to transport, and widely accepted by recyclers.

Used as part of a simple waste management regime, Ag-mac machines help increase efficiency, improve recycling rates and dramatically reduce the cost of waste disposal.

Contact our friendly and knowledgeable staff to find out how an Ag-mac machine can benefit your business!

Ag-mac MG15 Oil Filter & Can Crusher

The Ag-mac MG15 crushes used oil filters and cans to a fraction of their original size, minimising storage and disposal costs.

It features a 15 tonne press force and generously-sized compaction chamber, and will crush cans of up to 30 litres' capacity as well as used oil filters.

Waste oil is ducted away via a drain point, allowing it to be collected for recycling or disposal.

The machine's compact design and clean operation mean that it can be conveniently sited wherever the waste material is produced. As well as reducing disposal costs, it can improve the tidiness of the workshop area!

Features

- Electro-hydraulic operation delivering 15 tonne press force
- Large crush chamber
- Safety interlocks prevent operation with door open
- Waste oil drainage system
- Base suitable for fixing to the floor
- 12-month manufacturer's warranty

Optional Extras

- 2.2kW 3-phase power

Technical Specifications	Ag-mac MG15
Press force (max)	15 tonnes
Chamber (HxWxD)	500 x 400 x 400mm
Cycle time	25 seconds
Machine weight	275kg
Power supply	4kW 230V
Dimensions (HxWxD)	2090 x 700 x 750mm
