

Take control of your waste!

Agritel supplies crushing and baling machines for a wide variety of waste material. Compacted waste is easier to handle, cheaper to transport, and widely accepted by recyclers.

Used as part of a simple waste management regime, Ag-mac machines help increase efficiency, improve recycling rates and dramatically reduce the cost of waste disposal.

Contact our friendly and knowledgeable staff to find out how an Ag-mac machine can benefit your business!

Ag-mac PC206 Pneumatic Can Crusher

The Ag-mac PC206 makes light work of compacting large waste cans to a fraction of their original size – with a corresponding reduction in the cost of disposal!

The machine is designed for compacting empty cans; it will crush individual large drums (up to 30 litres' capacity) or several smaller cans at once.

Spark-free pneumatic operation makes the PC206 safe for use in flammable areas. It is ideal for vehicle repairers, spray shops or any workplace using solvent-based materials, and its compact footprint allows it to be sited wherever it's needed.

Like all Ag-mac machines, the PC206 is safe and simple to use and, although competitively priced, it is robustly built for long-term, reliable operation

Features

- Pneumatically operated from air-line or compressor
- 1600kg crush force at 8 bar pressure
- Handles cans of up to 30 litres' capacity
- Safety interlocks prevent operation with door open
- ATEX certified (Group II Category 3GD)
- Compact footprint – can be sited wherever it's needed
- 12-month manufacturer's warranty

Technical Specifications	Ag-mac PC206 Can Crusher
Crush force	1680kg at 8 bar
Chamber (HxDxW)	580 x 350 x 370mm
Loading aperture (HxW)	560 x 345mm
Air requirement	6 – 10 bar
Machine weight	95kg
Dimensions (HxDxW)	1780 x 450 x 500mm
